WORK EXPERIENCE

Taco Bell

Senior Business Intelligence Developer

San Diego, CA

Feb 2025 – Present

- Led development and deployment of 10+ enterprise-grade Power BI dashboards tracking nationwide sales performance across all U.S. Taco Bell locations.
- Managed multiple contractors to ensure timely, high-quality delivery of BI initiatives, including dashboard rollouts, bug tracking, and enhancement sprints.
- Partnered with data engineering teams to design and implement production-grade tables, ensuring high data quality, stability, and scalability.
- Optimized mission-critical SQL queries powering financial and operational reports, cutting load times by 50% and improving decision-making agility.
- Implemented Microsoft Fabric to streamline and scale backend data pipelines, enabling faster reporting and centralized data governance.

Animal Supply Company

BI & Forecasting Analyst

San Diego, CA

June 2024 – Feb 2025

- Delivered executive-facing dashboards in Power BI and Tableau that translated raw sales data into actionable insights, influencing pricing and supply chain decisions.
- Developed predictive models in Python for demand forecasting, driving business transformation through reduced overstock and optimized planning.

Midland Credit Management

Data Pipeline Engineer

San Diego, CA

June 2023 – June 2024

- Engineered scalable ETL pipelines to process and standardize 100s of financial reports, ensuring timely and accurate KPI delivery for stakeholders.
- Automated performance monitoring dashboards, improving data reliability and allowing leadership to act on trends in near real-time.

PCS Industries

BI Developer & Owner

San Diego, CA

January 2018 – June 2023

- Translated customer requirements into tailored reporting solutions using SQL, Redshift, and Power BI, improving e-commerce performance visibility.
- Advised leadership on data-driven sourcing strategies, reducing procurement costs and increasing market competitiveness.
- - Owned full-stack dashboard delivery from stakeholder engagement to production deployment, mirroring solution lifecycle at Microsoft.
